LETTER TO THE EDITOR

HARTUNG, J., Carcinogenesis and *post hoc* Conclusions from Cybrids 715

Index to Volume 97

ABUGOV, R. (see TORO, M.), 699
ADAMS, J. M. (see SEVERNS, M. L.), 239
Ageing and the genetic program of cell death, 591
Alloesterism, hemoglobin, a proton motive force transducer and its role in, 95
Allosteric proteins, dynamical behaviour of ligand binding of, 491
Altruism in haploid and diploid species, evolutionarily stable levels of, 437
Angiosperms, gene centromere mapping and detection of post-meiotic segregation by genotyping the polar nucleus, 603
Animal cell physiology, the role of polyamines in, 577
Animals, do they convey information about their intentions?, 1
ARMSTRONG, D. R., BRECKENRIDGE, R. J. and SUCKLING, C. J., Muscimol and some aza analogues: molecular orbital calculations relating to their potency as GABA mimetics, 267
Attenuation control mechanism, a theoretical study of, 277
Aza analogues and muscimol; molecular orbital calculations relating to their potency as GABA mimetics, 267

Base sequence patterns of promoter and terminator sites in ϕX174 and fd phage DNAs, 415
BECKWITH, A. C. and JURSINIC, P. A., An alternative mathematical approach to the analysis of photosynthetic oxygen evolution, 251
BHAGWAT, S. G. (see RAO, I. N.), 603
Bioactivation, extramicrosomal, non-enzymatic, of chemical carcinogens by phagocytes: a proposed new pathway, 543
Biology, historical, and the problem of design, 57
BLISS, R. D., PAINTER, P. R. and MARR, A. G., Role of feedback inhibition in stabilizing the cassical operon, 177
Blood–brain barrier: an alternative hypothesis, 167
Brain–blood barrier: an alternative hypothesis, 167
Brains, simple folded, a geometric model for the cortical folding pattern of, 529
BRECKENRIDGE, R. J. (see ARMSTRONG, D. R.), 267
BREMERMANN, H. J., Reliability of proliferation controls. The hayflick limit and its breakdown in cancer, 641
BRITTON, N. F., A model for suppression and dominance in trees, 691
Bubble rafts, epithelia as; a new method for analysis of cell shape and intracellular adhesion in embryonic and other epithelia, 625
BURNETT, L., A model for the mechanism and control of eukaryote gene splicing, 351

Cancer, the hayflick limit and its breakdown in; reliability of proliferation controls, 641
Carcinogenesis and the genetic program of cell death, 591
Carcinogenesis and *post hoc* conclusions from cybrids (letter), 715

Carcinogens, chemical, non-enzymatic extramicrosomal bioactivation of, by phagocytes; a proposed new pathway, 543
CARYL, P. G., Telling the truth about intentions, 679
Catalysis, enzyme, electronic aspects of proton-electron density displacements, 195
Cell cycle, unstable activator model for size control of, 505
Cell death, the genetic program of; hypothesis and some applications: transformation, carcinogenesis, ageing, 591
Cell physiology, animal, the role of polyamines in, 577
Cell shape and intracellular adhesion in embryonic and other epithelia, a new method for analysis; epithelia as bubble rafts, 625
CHARLESWORTH, B. (see TORO, M.), 699
Circadian rhythm, influence of ^{3}HTdR on; a model analysis for mouse epidermis, 371
Circadian rhythmicity, photooxidation and the evolution of, 77
Classical operon stability and the role of feedback inhibition, 177
COLEMAN, A. W., Sex is dangerous in a world of potential symbionts or the basis of selection for uniparental inheritance, 367
Compartmental transport models, the relation between Krogh and, 239
Competitive and extinctive evolution combine into a unified model of evolution, 13
Contests, why is lying about intentions rare during some kinds of?, 7
Contraction rhythm in plasmodia of myxomycete *Physarum polycephalum*, initiation, development and termination of, 87
Control mechanism, attenuation, a theoretical study of, 227
Cortical folding pattern of simple folded brains, a geometric model for, 529
Courtship handicap—phenotypic effect, 319
CRISCI, J. V., Parsimony in evolutionary theory: law or methodological prescription?, 35
Cruciform structures of DNA: implications for telomer replication in eukaryotes and instability of long palindromic DNA sequences in prokaryotes (letter), 343
Cybrids, carcinogenesis and *post hoc* conclusions from (letter), 715

DAVIS, W. B. (see JACKSON, R. J.), 481
Death of cells, the genetic program of; hypothesis and some applications: transormation, carcinogenesis, ageing, 591
Design, historical biology and the problem of, 57
Development and evolution, 43
DEXTER-DYER GROSOVSKY, B., What are the selective advantages of metal deposition and solubilization by microbes? (letter), 83
Diffusion, axial, and permeability barriers, their effects on the transient response of tissue cylinders. Solution in transform space, 663
Dioecious wind pollinated trees, tree density, pollen–ovule ratio and sex ratio in, 289
Diploid species, evolutionarily stable levels in 437
DNA cruciform structures: implications for telomer replication in eukaryotes and instability of long palindromic DNA sequences in prokaryotes (letter), 343
DNAs of ϕX174 and fd phages, characteristic base sequence patterns of promoter and terminator sites in, 415
Dominance and suppression in trees, a model for, 691
DUNKER, A. K., A proton motive force transducer and its role in proton pumps, proton engines, tobacco mosaic virus assembly and hemoglobin alloesterism, 95

Ear, an electrostatic model for mechano-electrical transduction in, 611
Ecological role and evolutionary basis of toxic microbial secondary metabolites, 325
Ecosystem models, feasibility constraints on the elastic expansion of, 277
Electronic aspects of enzyme catalysis proton–electron density displacements, 195
Electrostatic model for mechano-electrical transduction, especially in the ear, 611
Embryonic epithelia, a new method for analysis of cell shape and intracellular adhesion in; epithelia as bubble rafts, 625
EMILIANI, C., Extinctive evolution—extinctive and competitive evolution combine into a unified model of evolution, 13
Enzymatic reaction, the short time scale behaviour is always stable: comment to a paper by Seshadri and Fritzsch (letter), 341
Enzyme catalysis proton–electron density displacements, electronic aspects of, 195
Epidermis, mouse a model analysis for the influence of ^{3}HTdR on the circadian rhythm, 371
Epithelia as bubble rafts: a new method for analysis of cell shape and intracellular adhesion in embryonic and other epithelia, 625
Eukaryote gene splicing, a model for the mechanism and control of, 351
Eukaryotes, implications of DNA cruciform structures for telomer replication (letter), 343
Eukaryotic mRNAs, transport and splicing of; a theoretical model, 129
Evolution of circadian rhythmicity, and photooxidation, 77
Evolution and development, 43
Evolution, extinctive and competitive evolution combine into a unified model of, 13
Evolution, photosynthetic oxygen, an alternative mathematical approach to the analysis of, 251
Evolution of sex, and pathogens, polymorphism, 557
Evolutionarily stable levels of altrusim in haploid and diploid species, 437
Evolutionary basis and ecological role of toxic microbial secondary metabolites, 325
Evolutionary theory, parsimony in; law or mehodological prescription?, 35
Extinctive and competitive evolution combine into a unified model of evolution, 13

fd and ϕX174 phage DNAs, characteristic base sequence patterns of promoter and terminator sites in, 415
Feedback inhibition, role in stabilizing the classical operon, 177
FESSER, K. (see WICHMANN, H. E.), 371
FINDLEY, A. M., FINDLEY, G. L. and MCGLYNN, S, P., Genetic coding: approaches to theory constriction, 299
FINDLEY, G. L., (see FINDLEY, S. M.), 299
Fish numbers, why do they vary?, 69
Folding pattern, cortical, of simple folded brains, a geometric model for, 529

GABA mimetics, molecular orbital calculations relating to the potency of muscimol and some aza analogues as, 267
GANDEVIA, S. C. and MAHUTTE, C. K., Theoretical requirements for the interpretation of signals of intramuscular tension, 141
Gene centromere mapping and detection of post-meiotic segregation in angiosperms by genotyping the polar nucleus, 603
Gene splicing, eukaryotic, a model for the mechanism and control of, 351

Genetic coding: approaches to theory constriction, 299
Genetic program of cell death, hypothesis and some applications: tranformation, carcinogenesis, ageing, 591
Generation time, stage dependent, stationary stage structure of yeast population with, 393
GOODWIN, B. C., Development and evolution, 43
GORDON, R. (see STEIN, M. B.), 625
GOYNS, M. H., The role of polyamines in animal cell physiology, 577
GULLAND, J. A., Why do fish numbers vary?, 69

Habituation as a mechanism of intersexual selection (letter), 333
HAMADA, T., KANNO, S and KANO, E., Stationary stage structure of yeast population with stage dependent generation time, 393
Haploid and diploid species, evolutionarily stable levels of altruism in, 437
HARTUNG, J., Carcinogenesis and *post hoc* conclusions from cybrids (letter), 715
HASTINGS, H. M., The May–Wigner stability theorem, 155
Hayflick limit and its brakdown in cancer; reliability of proliferation controls, 641
Hemoglobin alloesterism, a proton motive force transducer and its role in, 95
Hemoproteins, theoretical studies of; dynamical behaviour of ligand binding of allosteric proteins, 491
Historical biology and the problem of design, 57
^{3}HTdR, influence on the circadian rhythm—a model analysis for mouse epidermis, 371

Information about intentions, is it conveyed by animals?, 1
Inheritance, uniparental, sex is dangerous in a world of potential symbionts or the basis of selection for, 367
Intentions, do animals convey information about their?, 1
Intentions, lying about, why is it rare during some kind of contests?, 7
Intentions, telling the truth about, 679
Intersexual selection, habituation as a mechanism of (letter), 333
Intestinal proliferon hypothesis (letter), 337
Intestinal proliferon hypothesis (letter), 541
Intracellular adhesion in embryonic and other epithelia, a new method for analysis of cell shape and; epithelia as bubble rafts, 625
Intramuscular tension, theoretical requirements for the interpretation of signals of, 141
Ions in the sweat duct, a mathematical approach to the prediction of the rate of penetration of, 481

JACKSON, R. J. and DAVIS, W. B., A mathematical approach to the prediction of the rate of penetration of ions in the sweat duct, 481
JACKSON, R. R., Habituation as a mechanism of intersexual selection (letter), 333
JURSINIC, P. A. (see BECKWITH, A. C.), 251

KANO, E. (see HAMADA, T), 393
KANNO, S. (see HAMADA, T.), 393
KIKUCHI, T. and NISHIMOTO, K., Theoretical studies of hemoproteins. II. Dynamical behaviour of ligand binding of allosteric proteins, 491

Kin selection, exact versus heuristic models of, 699
KOBATAKE. Y. (see UEDA, T.), 87
Krogh and compartmental transport models, the relation between, 239
KUNISAWA, T. (see OTSUKA, J), 415
